## SUMMARY

---

ISC2 Certified in Cybersecurity (CC) analyst with 4+ years of IT operations experience and 28 documented blue-team projects spanning Splunk SIEM engineering, incident response, DFIR investigation, and live AWS CloudTrail analysis each producing analyst-grade reports with MITRE ATT&CK mappings. Built a risk-based Splunk detection platform with 5 correlation searches and ran a full mock SOC shift that correlated 3 separate alerts into a single coordinated phishing campaign by tracing shared C2 infrastructure across all three tickets.

## WORK EXPERIENCE

---

### SOC Analyst - Self-Directed Lab Program April 2026 - Present Independent Security Research Remote

- Faced with a 6-alert overnight SOC queue, triaged and investigated each alert using Splunk and VirusTotal, correlating 3 tickets to a single coordinated phishing campaign via shared C2 IP, resulting in 2 critical escalations to Tier 2 with full evidence packages and shift handover report.
- Working in a high-volume SIEM environment, engineered a risk-based alert priority queue using 5 correlation searches and 4 IOC enrichment lookup tables, reducing manual triage by 2-3 analyst hours per shift.
- Identified 2 detection gaps after mapping a 10-stage attack chain to MITRE ATT&CK Enterprise, closed one immediately by engineering a new Splunk SPL rule for sudo abuse (T1548.003), improving overall detection coverage.

### Professional developments and projects:

- Documented 28 SOC lab projects on GitHub covering SIEM engineering, incident response, digital forensics, and cloud security, each with analyst reports and MITRE ATT&CK mappings: [github.com/WiLL75G](https://github.com/WiLL75G)
- Passed ISC2 Certified in Cybersecurity (CC) and currently studying CompTIA Security+ (SY0-701), targeting Q3 2026.

### IT & Virtual Assistant Jan 2020 - May 2024 - Freelance · ALX Programs · Future Football Academy Accra, Ghana

- Managing sensitive data across 10+ client engagements, implemented structured access control and data handling procedures, building the confidentiality discipline and documentation precision directly applied to SOC incident tickets and shift handover reports.
- Tasked with reducing manual workload, built AI-driven automation workflows, developing the scripting mindset applied in Python log parsers and PowerShell SOC investigation toolkits.
- Enrolled in ALX Africa programs covering AI fundamentals, IT operations, and project management, establishing the technical foundation that underpinned full transition into cybersecurity.

### Key Projects

#### [Mock SOC Shift Simulation - Splunk, VirusTotal, PowerShell, MITRE ATT&CK | 2026](#)

- Triaged a 6-alert overnight queue and discovered shared C2 infrastructure connecting 3 separate alerts into one coordinated campaign, escalating 2 critical incidents to Tier 2 with complete evidence packages and shift handover report.

#### [Advanced Splunk Intelligence Platform - Splunk, SPL, Lookup Tables | 2026](#)

- Built 5 correlation searches, 4 IOC lookup tables, and a risk-based priority queue in a high-volume SIEM environment, reducing manual triage by 2-3 analyst hours per shift.

#### [Digital Forensics Investigation \(DFIR\) - FTK Imager, Volatility3, EZ Tools | 2026](#)

- Investigated a suspected compromise by collecting volatile evidence, acquiring a memory image, and analyzing with Volatility3, reconstructing a 48-hour attack timeline with chain of custody documentation.

#### [AWS Cloud Security Investigation - AWS CloudTrail, IAM, S3, Splunk | 2026](#)

- Analyzed CloudTrail logs in a live AWS environment, detecting 3 critical findings including a public S3 bucket, unauthorized IAM user, and root account without MFA, remediating all 3 with SOC 2 and ISO 27001 compliance tagging.

### [Incident Response Playbook Lab - NIST SP 800-61, SANS PICERL, Splunk | 2026](#)

- Developed 3 IR playbooks and executed a full 6-phase simulation, producing incident reports with IOC tables, root cause analysis, and remediation recommendations.

### **SKILLS & TOOLS**

---

**SIEM & Detection:** Splunk, SPL, Correlation Searches, Alert Rules, Lookup Tables, SPL Macros, Risk-Based Triage

**IR & Forensics:** NIST SP 800-61, SANS PICERL, FTK Imager, Volatility3, EZ Tools, Chain of Custody

**Threat Intelligence:** MITRE ATT&CK, VirusTotal, Shodan, AbuseIPDB, AlienVault OTX, IOC Enrichment

**Endpoint & Network:** Wazuh EDR, Wireshark, Nmap, Windows Event Logs, Linux Forensics, Active Directory

**Cloud & Compliance:** AWS CloudTrail, IAM, S3, Zero Trust, PCI-DSS, HIPAA, ISO 27001, SOC 2

**Scripting:** PowerShell, Python, Bash, Regex, Custom Log Parsers, OpenVAS, CVSS v3.1

### **CERTIFICATIONS & PROFESSIONAL DEVELOPMENT**

---

- ISC2 Certified in Cybersecurity (CC) 2026
- CompTIA Security+ — In Progress, Target Q3 2026
- Splunk Core Certified User Planned, Target Q3 2026
- 30-Day SOC Analyst Portfolio Program (28 Labs) 2026
